

## DEPARTMENT OF ENVIRONMENTAL PROTECTION & SUSTAINABILITY

### Interoffice Memo

TO: Stephen Emm  
Bureau of Engineering & Construction, Water Design Section

FROM: Thomas L. Vidmar, P.E. /signed/  
Deputy Director, EPS

DATE: August 8, 2014

SUBJECT: GREYHOUND ROAD, ANTHONY AVENUE AND ROSALIE AVENUE  
8" WATER MAIN REPLACEMENT  
Stormwater Management Variance  
Middle River Watershed  
**EPS Project ID: M140170**  
**Tracking Number: 06-14-1853**

This office has reviewed the information submitted and finds that a stormwater management variance can be granted for this project under Section 33-4-113 (a) (2) of Title 4 of the Baltimore County Code. This section of the regulations allows a stormwater management variance to be granted if there are exceptional circumstances such that strict adherence to the provisions of this article would result in unreasonable hardship or practical difficulty and not fulfill the intent of the regulations. This project is for the replacement of an existing water main. The existing cover conditions will be re-established once the water main is installed. There will be no change in impervious areas as a result of this project so the rate and volume of runoff will not increase.

Please contact Ed Schmaus of my staff at 410-887-3768 should you have any questions.
